

Computing Technology for Math Excellence

Preparing for the Ohio Graduation Test in Mathematics

Strand Resources: Geometry and Spatial Sense

The following pages are for students. Use them to help you monitor your own test preparation. The resources are provided at CT4ME:

https://www.ct4me.net/Ohio_Graduation_Math_Test_Prep_GeometryStrand.htm

Directions:

1. Identify the benchmark (A-I) below for review in Geometry and Spatial Sense. Below the benchmark, you will find Web resources for reviewing the concept and practice problems.
2. *Before beginning the Web exercises* for the benchmark you chose, fill in the “K” column: What do you already know about that benchmark? Then in the “W” column: Write what you still want to know.
3. When you have completed using a resource provided, place a check in the box in the first column. This will help you keep track of resources used. Decide if the resource was helpful. Write “yes” or “no” in the last column. Add your comments, if any, about the resource.
4. *After using all the resources* for each benchmark, go to the “L” column and write what you learned. Read your “K” column entries again to see if any of your prior knowledge was inaccurate, and rewrite those statements so that they are correct.
5. Look at the “W” column again, and place a check next to any of your questions that were not answered by using the resources. Be sure to mention those questions in class. Decide how you will find answers to those remaining questions.
6. *When you have completed all of the exercises provided with each benchmark and your K-W-L chart is complete*, reflect on your overall understanding of the benchmark. Be honest with yourself. In the last column circle your belief about your level of mastery: still no or very little understanding (N), some to a great deal of progress (P), I’ve got it!-- mastery (M).

Name _____

NOTE: As general resources for all Geometry and Spatial Sense benchmarks, students might consult the following:

- [Math Open Reference](#) is a free geometry textbook for high school learners. There are topics in plane geometry, coordinate geometry, and solid geometry (e.g., cylinders, cubes). Its focus is on using interactive materials and animations to develop concepts. Students can manipulate numerous interactive applets with at least one accompanying nearly every concept that is presented.

A. Formally define geometric figures.		Circle Mastery Level: N P M
What I K now	What I W ANT to know	What I L earned
Check when completed	Resources	Was the Web resource helpful? (yes/no) Comment(s)
	Math.com: Geometry basics. Figures are defined with lessons, examples, workout quizzes, and unit quizzes	

Name _____

	Mathwords.com: interactive math dictionary with words, terms, formulas, pictures, diagrams, tables, and examples	
	Explore Learning Gizmos (Virtual Manipulatives): Quadrilaterals and other Polygons .	
	Geometry 3-D Shapes is an interactive from Annenberg Learner. Learn about three-dimensional shapes, calculate surface area and volume, and discover some of the mathematical properties of shapes. It comes with a glossary, tutorials, and an interactive test.	

Name _____

B. Describe and apply the properties of similar and congruent figures; and justify conjectures involving similarity and congruence.		Circle Mastery Level: N P M
What I K now	What I W ANT to know	What I L earned
Check when completed	Resources	Was the Web resource helpful? (yes/no) Comment(s)
	<p>AlgebraLab.org: Lesson and fill in the blank practice problems, including word problems. Be sure to show the related AlgebraLab documents for additional practice problems on each topic.</p> <ul style="list-style-type: none"> • Congruent Triangles • Similar Triangles 	

Name _____

	Math.com: Congruent and similar figures including lesson and workout problems	
--	---	--

	Utah State University, National Library of Virtual Manipulatives: investigate methods for determining congruent triangles . Explore SSS, SAS, ASA, SSA. Note SSA does not guarantee congruent triangles.	
--	--	--

Name _____

C. Recognize and apply angle relationships in situations involving intersecting lines, perpendicular lines and parallel lines.		Circle Mastery Level: N P M
What I K now	What I W ANT to know	What I L earned
Check when completed	Resources	Was the Web resource helpful? (yes/no) Comment(s)
	<p>AlgebraLab.org: Lesson and fill in the blank practice problems. Be sure to show the related AlgebraLab documents for additional practice problems on each topic.</p> <ul style="list-style-type: none"> • Parallel Lines and Transversals 	

Name _____

	<ul style="list-style-type: none">• Slope of Parallel and Perpendicular Lines	
	Math.com: Angles and Intersecting Lines including lesson and workout problems	
	Shodor Interactivate: Angles formed by parallel lines and one or two transversals. This activity allows users to practice angle vocabulary.	

Name _____

	<p>Walter Fendt's Sum of Angles in a Triangle, Virtual Manipulative</p>	
	<p> Play the YouTube video from the Ohio Resource Center Tutorials for High School Mathematics: Parallel lines, polygons, and the Pythagorean Theorem for finding values for alternate interior angles, finding values for the exterior angles of regular polygons, and using the Pythagorean theorem.</p>	

Name _____

D. Use coordinate geometry to represent and examine the properties of geometric figures.		Circle Mastery Level: N P M
What I K now	What I W ANT to know	What I L earned
Check when completed	Resources	Was the Web resource helpful? (yes/no) Comment(s)
	Math Warehouse: Using the coordinate plane in proofs is an interactive demonstrating how to do coordinate proofs. Do the proofs (perpendicular segments, trapezoid is not isosceles, and rectangle) and see the answers.	

Name _____

E. Draw and construct representations of two- and three-dimensional geometric objects using a variety of tools, such as straightedge, compass and technology.		Circle Mastery Level: N P M
What I K now	What I W ANT to know	What I L earned

Are you ready for the test?

1. Don't forget to review and complete the Six Steps for Success, including the full online practice tests. See: https://ct4me.net/Ohio_Graduation_Math_Test_Prep.htm
2. Complete an online OGT Practice Test. See: <http://ogt.success-ode-state-oh-us.info/studentsOGT.htm>

How did you do?

Score: _____ right out of _____ questions.

Look at the “W” column again for the benchmarks you chose to work on. List the questions you checked that you still have. For each of those, decide how you will find the answer.

What I still WANT to know—my unanswered questions	My Plan to Find the Answers
